

114098 – PRODUCT MAINTENANCE – SECURITY TO PREVENT EDITING PRODUCT CODES

1 INTRODUCTION

New workgroup security has been added to only allow system administrators or super users from changing product codes once they have been initially saved.

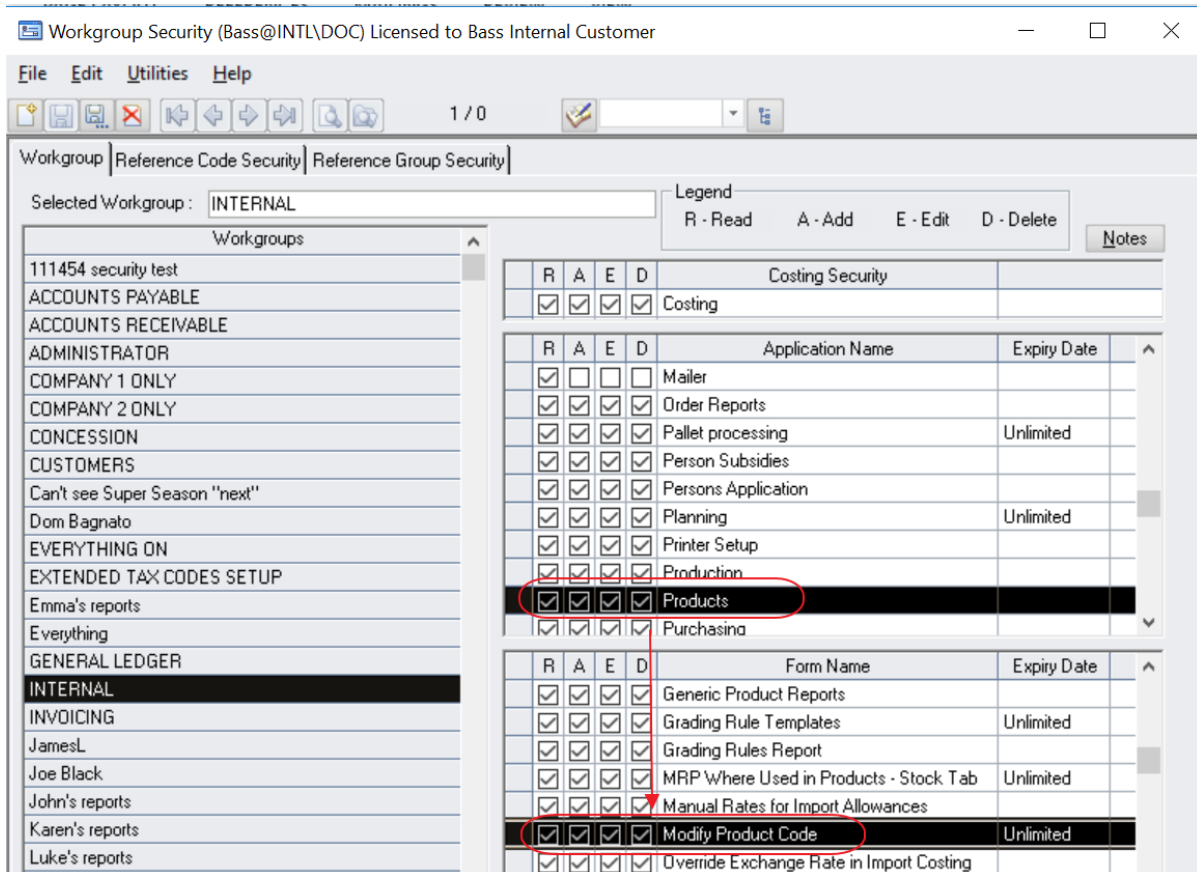

2 BENEFITS

- ✓ Better control - Minimise issues with product code changes when interfacing with other systems

3 SETUP

3.1 WORKGROUP SECURITY

'Modify Product Code' workgroup security item added to control editing of product codes.

E-dit security activates the new feature.

4 DESCRIPTION / USAGE

On upgrade to 2019, users who have E-dit security on Products workgroup security will be automatically granted E-dit security on new 'Modify Product Code' workgroup security.

Only users who have E-dit access for the new workgroup security are allowed to change product codes once they are initially saved.
