

114872 STOCK REPLENISHMENT - NEW SELECTION FILTERS FOR PRODUCT.COLOUR

1 INTRODUCTION

When setting up replenishments, some customers want more control over what styles and colours are loaded into the replenishment session. The ability to be able to filter for a style/colour has been added to the replenishment setup query

2 BENEFITS

- ✓ More options to include/exclude certain style colours.

3 ASSUMPTIONS/LIMITATIONS

Using this new field will provide a refined selection and if used in the 'Include' column will exclude every other product colour not listed.

4 SETUP

None

5 DESCRIPTION / USAGE

A new field has been added to the replenishment query grid.

The field labelled 'Product Colour' allows a product.colour combination to be selected to refine the replenishment selections to particular style colours (or exclude them)

The screenshot shows the 'Stock Replenishment' application window. The 'Utilities' section is expanded, displaying a grid of fields for selection. The 'Product Colour' field is highlighted with a red box, indicating its new inclusion in the query grid.

Name	From	To	Include	Exclude	Nulls
Replenishment warehouse	Lowest	Highest	Main		<input type="checkbox"/>
Retail stores	Lowest	Highest			<input checked="" type="checkbox"/>
Product Code	Lowest	Highest			<input checked="" type="checkbox"/>
Colour	Lowest	Highest			<input checked="" type="checkbox"/>
Dimension	Lowest	Highest			<input checked="" type="checkbox"/>
Product Colour	Lowest	Highest			<input checked="" type="checkbox"/>
Purchase Order Header Due Date	Lowest	Highest			<input checked="" type="checkbox"/>
Product - Product Group	Lowest	Highest			<input checked="" type="checkbox"/>
Product - Stock type for Purchasing	Lowest	Highest			<input checked="" type="checkbox"/>
