

SALESNET – ADD OPTION TO SHOW / HIDE PRODUCT COLOUR CODE

1 INTRODUCTION

A new configuration option has been added into *SalesNet* deployment settings to show or hide the product colour code. Prior to this change, only the colour description was shown on the website.

2 BENEFITS

- ✓ Easier order entry process for customers that require both product code and colour code to identify a product

3 SETUP

The below SalesNet configuration setting must be activated.

3.1 SALESNET CONFIGURATION OPTION

Set the 'ShowClrCode' setting to true in Deployment Console against the SalesNet application. This defaults to false for all sites.

Deploy the SalesNet website.

Deployment Console (BASS@intl\DOC) Licensed to Bass Internal Customer

Create: Choose application ... **New** Filter: Show all

CanCartStockDueDate	true
CatalogueImageTypeRcidx	9923
CopyOrders	true
CreditStatusOverDaysLimit	ACCOUNT OVERDUE
ShowClrCode	true
ProductsPageSize	18
ShowIncomingStock	true
ShowNoStockProducts	true

4 DESCRIPTION / USAGE

When the new configuration setting is activated, the colour code is shown with the colour description. When this is false, only the colour description is shown. The following SalesNet pages have been changed:

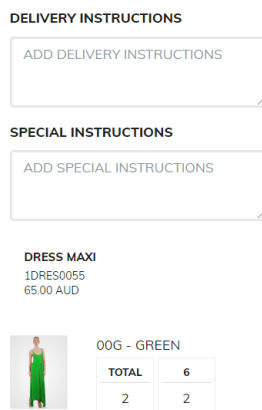

- Product listing page – Mouse over

- Product details page

- Order Summary

- Print Friendly Report
